About me

As a Level Designer with over four years of training in the gaming industry, I have honed my skills in creating immersive and engaging game environments. My expertise lies in utilizing industry-standard tools such as Unreal Engine and Blender to bring my designs to life. With a strong background in 3D modeling, texturing, and lighting, I am confident in my ability to collaborate with cross-functional teams to deliver high-quality game experiences. My passion for gaming and commitment to staying up-to-date with the latest trends and technologies make me an asset to any development team. My goal is to make 3D environments interiors & exterior, making props & placement in level design.
